One System Advantage

e-Fuel Delivery Management has been developed as an All-In-One System specifically for propane marketers to manage their delivery operations. e-Fuel includes tank monitors, a utility grade tank monitor deployment and maintenance system, real time weather forecasting, a live 90 day order queue for scheduling, mapping, and routing and our *Windows 8* tablet based mobile system with live sync, GPS tracking and wireless meter control. e-Fuel delivers real value as a web site service providing a streamlined set of automated tools that allow your company to operate at a new level of service and efficiency.

e-Fuel Delivery Management is a low cost, low risk system. Easily migrate from your existing system to the most advanced system on the market. Run parallel with your existing system when starting out. No IT investment-fits into your existing business setup. No contract required-try it month to month. Available in three versions, Lite, Pro or Enterprise, there is a version of e-Fuel that will fit your business now and into the future.

Features

e-Fuel is a *Windows* based feature rich business platform that automates repetitive tasks, and gives both drivers and operations additional control over schedules and sudden customer requests while minimizing drive time and delivering the most gallons per mile. Comprehensive tank monitor status is displayed throughout e-Fuel giving you the latest fuel level information where you need it. Revolution Forecasting provides the most accurate prediction of when a customers tank will hit the target fill % using historical fuel usage, historical weather, fuel usage statistics profiles, tank monitor data and observed tank level. PowerMax Scheduling offers 5 automatic and 2 manual scheduling methods that allow you to tailor your delivery scheduling to your customers needs and still run automatically. e-Fuel Mobile seamlessly extends fuel delivery automation from the office to the driver and back. e-Fuel works with leading propane accounting systems and we also provide custom account integration.

Call us today for an online demo to see how e-Fuel will add value to your delivery operations.

PowerMax Scheduler Features			
Version Comparison	Lite	Pro	Enterprise
Automatic Scheduling Engine-Can accommodate any scheduling requirement.	NA	Y	Y
90 Day Order Queue-Automatically maintains up to date schedules, maps and routes for all active customer tanks.	NA	Y	Y
